

Job-opening: postdoctoral researcher KU Leuven

Requirements:

We are seeking a postdoctoral researcher within the field of electric power engineering. Specifically any of the following research domains are of interest: Transmission system investments, transmission tariff design, transmission system governance, grid development with large scale integration of renewable energy sources, modeling of the future power system.

Strong applicants from other (related) fields are considered as well.

The following skills and qualifications are sought for:

- PhD in power engineering, energy economics, or related field
- Good knowledge about power system economics in the European context
- be able to manage research projects and researchers (incl. supervising PhD students)
- being able to work and communicate in a multinational working environment.

Opportunities:

The applicant will have the opportunity to build his own research around the PhD work of 3 (or 4) students, as well as to coordinate the involvement in the KU Leuven in an FP7 project.

The selected applicant will be offered a position for a period of one year, with possible extension(s). The project starts as soon as a suitable candidate has been found.

Contact

Applicants should send their curriculum vitae, a brief statement of their research experience and interests before April 15, 2012 to **Dirk Van Hertem**: dirk.vanhertem+postdoc@esat.kuleuven.be.
